

## I heard this rumor about the COVID vaccine. Is it true?

**The vaccine will alter my DNA? FALSE.**

The vaccine does not have DNA. It has mRNA, which breaks down outside your cells after your immune-system uses it to create antibodies.

**I don't need to wear a mask after I get the vaccine? FALSE.**

Even if you have the vaccine, you may still get exposed to the virus. Wear a mask to protect yourself and others.

**I have to pay for the vaccine? FALSE.**

The vaccine is free. Some providers may charge an administration fee for giving the shot. Beware of scams claiming that they can get you the vaccine for money.

**If I already had COVID-19, I don't need the vaccine? FALSE.**

The COVID-19 vaccine is recommended for all adults. COVID antibodies can disappear after infection. The vaccine gives you important additional protection.

**The vaccine will put a microchip into my body? FALSE.**

There is no microchip in the vaccine. This is simply false.
